aircraft to continue in use. Individual airports would still be allowed to optout of this measure by choosing to accommodate these noisier business jets. Also, the act would not take effect until fully 3 years after enactment, allowing ample time for businesses to adapt to the new regulations.

Mr. President, I believe that this bill represents a significant step forward in the ongoing efforts to control aircraft noise, and I urge my colleagues to support the legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Mr. LUGAR (for himself, Mr. BIDEN, and Mr. REID) submitted the following resolution; which was considered and agreed to:

S. RES. 627

Whereas on November 9, 2005, a series of terrorist bombs exploded at the Radisson, Hyatt, and Days Inn hotels in Amman, Jordan, resulting in the deaths of scores of civilians and the injuries of hundreds of others:

Whereas Jordan has been targeted in several terrorist attacks over the past few years and likely remains a target for Islamic extremists:

This bill condemns the terrorist attacks that took place on November 9 and reaffirms the support of the U.S. Government for the Jordanian people and their government.

SENATE RESOLUTION 628—SUP-PORTING THE 200TH ANNIVER-SARY OF THE NATION'S NAUTICAL CHARTING AND RELATED SCIENTIFIC PROGRAMS, WHICH FORMED THE BASIS FOR WHAT IS TODAY THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Mr. STEVENS (for himself, Mr. INOUYE, Ms. SNOWE, Ms. LANDRIEU, Mr. GREGG, Mr. LOTT, Mr. REED, Ms. CANTWELL, Mr. VITTER, Mr. SALAZAR, Mr.

AKAKA, Mr. WYDEN, Mr. SMITH, Ms. MURKOWSKI, and Mr. COCHRAN) submitted the following resolution; which was considered and agreed to:

S. RES. 628

Whereas the Act of February 10, 1807 (chapter VIII; 2 Stat. 4113), signed by President Thomas Jefferson, authorized and requested the President "to cause a survey be taken of the coast of the United States...together with such other matters as he may deem proper for completing an accurate chart of every part of the coasts":

Whereas the Coast Survey was established to carry out the duties established under such Act, and was the first Federal science agency of the United States;

Whereas over time additional duties, including geodetic surveying and tide and current monitoring and predictions, were bestowed upon the agency, which was first known as the U.S. Coast Survey and later the U.S. Coast and Geodetic Survey;

Whereas, in addition to providing charts and information vital to the young nation's economic and commercial success, such pioneering agency led some of the nation's earliest oceanographic research, undertaking surveys of the Gulf Stream to determine temperatures, depths, direction, and velocity as well as the character of the seafloor and forms of vegetation and marine life:

Whereas the early technicians and scientists of such agency invented and supported the development of many innovative tools that led to advances in hydrographic, shoreline, and geodetic surveying and cartographic methods, the first real-time water level stations, and deep-sea anchoring;

Whereas during the 20th century such agency, by then re-named the Coast and Geodetic Survey, advanced the development and marine applications of electronics and acoustics, including the development of Radar Acoustic Ranging, radio sono-buoys and the Roberts Radio Current Meter Buoy;

Whereas throughout their history these programs have provided services in support of the Nation's commerce and defense serving in all theaters of the Civil War and in World Wars I and II as hydrographers, cartographers, topographers, and scouts, including the production of more than 100 million maps and charts for U.S. and Allied forces;

Whereas our Nation's interests and economy became increasingly interwoven with the marine and atmospheric environment, a number of Federal science agencies with complimentary functions, including the Weather Bureau and the Bureau of Commercial Fisheries, were combined with such agency to create the National Oceanic and Atmospheric Administration (NOAA);

Whereas today these mapping and charting, geodesy, and tide and current data programs are located in the National Ocean Service of NOAA, in the Coast Survey, the National Geodetic Survey, and the Center for Operational Oceanographic Products and Services:

Whereas these programs promote NOAA's commerce and transportation goals and continue to support the research, development and application of state-of-the-art surveying, mapping, charting, ocean observing, modeling, and Internet-based product delivery services to promote safe and efficient commerce and transportation and contributing to the advancement of integrated ocean and earth observing systems;

Whereas, these programs continue to demonstrate relevance, value, importance, and service promoting and employing innovative partnerships with other agencies, State and local authorities, academia, and the private sector:

Whereas, these programs work internationally as the United States representative to the International Hydrographic Organization and through other organizations to promote integrated and uniform standards, protocols, formats, and services:

Whereas in addition to commerce and transportation these programs also advance NOAA's weather and water, climate, and ecosystem missions including marine resource conservation, coastal management, and the protection of life and property from coastal storms and other hazards, as most recently demonstrated in responding to and facilitating the recovery of communities and commerce in the hurricane stricken Gulf Coast;

Whereas the devotion, industry, efficiency, and enterprise of these people and programs over their 200-year history have set an enviable record of public service: Now, therefore, be it.

Resolved, That the Senate-

- (1) recognizes that for over 200 years, the National Oceanic and Atmospheric Administration and its predecessor agencies have been providing the Nation research, service, and stewardship of the marine environment, through products and services that protect lives and property, strengthen the economy, and support and sustain our coastal and marine resources;
- (2) recognizes the vision of President Thomas Jefferson in supporting the advancement of science, and the survey of the coast in particular, to the welfare and commercial success of the Nation:
- (3) recognizes the contributions made over the past 200 years by the past and current employees and officers of the Office of Coast Survey, the National Geodetic Survey, and the Center for Operational Oceanographic Products and Services of the National Oceanic and Atmospheric Administration; and
- (4) encourages the people of the United States to salute and share in the planned celebrations of these historic programs during 2007 with ceremonies designed to give appropriate recognition to one of our oldest and most respected Federal agencies on the occasion of its bicentennial anniversary.

SEC. 4. DEFINITIONS.

In this resolution—

- (1) PERMANENT ARTWORK.—The term "permanent artwork" means artwork that when applied directly to a wall, ceiling, or floor has become part of the fabric of the building, based on a consideration of relevant factors including—
- (A) the original intent when the artwork was applied;
 - (B) the method of application;
- (C) the adaptation or essentialness of the artwork to the building; and
- (D) whether the removal of the artwork would cause damage to either the artwork or the surface that contains it.
- (2) SEMI-PERMANENT ARTWORK.—The term "semi-permanent artwork" means artwork that when applied directly to the surface of a wall, ceiling, or floor can be removed without damaging the artwork or the surface to which the artwork is applied.
